

COMMUNITY INVOLVEMENT PLAN

**PATRICK BAYOU
DEER PARK, HARRIS COUNTY TEXAS**

December 2008

**U. S. ENVIRONMENTAL PROTECTION AGENCY
REGION 6**

THE U. S. ENVIRONMENTAL PROTECTION AGENCY'S (EPA)
SUPERFUND COMMUNITY INVOLVEMENT PROGRAM IS COMMITTED
TO PROMOTING COMMUNICATION BETWEEN CITIZENS AND THE AGENCY.

ACTIVE PUBLIC INVOLVEMENT IS CRUCIAL TO THE SUCCESS OF ANY PUBLIC PROJECT.

EPA'S COMMUNITY INVOLVEMENT ACTIVITIES AT THE

PATRICK BAYOU

ARE DESIGNED TO

INFORM THE PUBLIC OF THE NATURE OF THE ENVIRONMENTAL ISSUES ASSOCIATED WITH

THE SITE,

INVOLVE THE PUBLIC IN THE DECISION-MAKING PROCESS THAT WILL AFFECT THEM,

INVOLVE THE PUBLIC IN THE RESPONSES UNDER CONSIDERATION TO REMEDY THESE

ISSUES, AND

INFORM THE PUBLIC OF THE PROGRESS BEING MADE TO IMPLEMENT THE REMEDY.

Section 1.0

Overview of the Community Involvement Plan

The U.S. Environmental Protection Agency (EPA) developed this Community Involvement Plan to facilitate two-way communication between the community surrounding the Patrick Bayou Superfund Site and EPA and to encourage community involvement in site activities. EPA will utilize the community involvement activities outlined in this plan to ensure that residents are continuously informed and provided opportunities to be involved.

This Community Involvement Plan addresses Patrick Bayou's relationship to the community and EPA (Section 2.0), provides a background of the community (Section 3.0), presents EPA's community involvement program (Section 4.0), and provides a listing of resources available (Appendices). EPA drew upon several information sources to develop this plan, including community interviews and site files. EPA's Regional Office will oversee the implementation of the community involvement activities outlined in this Plan.

Section 2.0

Capsule Site Description

2.1 Site History

The city of Deer Park was later established in 1892 by an Illinois settler and the creation of a rail station. The city received its name for the abundance of deer found in the area. . Deer Park's location to the Gulf of Mexico attracts industrial industries because of the shipping canal. Shell Oil Company was the first such industry to utilize the city's location to the Gulf in 1928. The city was officially incorporated in December 1948. Since that time, several other chemical and oil companies have emerged along the bank of the Houston Shipping Canal which incorporates the city of Deer Park. As a result of the city and industrial development and the potential of city flooding from hurricanes, storm water canals were developed as a means for draining water away from the city and back to the local bayous. Many of these storm water runoffs were diverted into Patrick Bayou. As industry grew in the area, these facilities utilized pre-existing storm water drains. Thus, rain water along with various industrial chemicals and oils exited these facilities and entered into Patrick Bayou.

2.2 Site Description/Location

The site is located in a mixed urban, highly industrialized petrochemical area in southeast Harris County, north of Deer Park, Texas. Patrick Bayou is one of several small bayous of the Houston Ship Channel (HSC) located within the lower portion of the San Jacinto River Basin. This 3-mile tidal bayou is on the south side of the HSC about 2 miles upstream of its confluence with the San Jacinto River. The Site consists of contaminated sediments within Patrick Bayou, a portion of the East Fork tributary, and associated wetlands. Patrick Bayou is bounded by Occidental Chemical, Shell Refinery, Shell Chemical, and Lubrizol Corporation. The bayou also receives effluent via ditches from the City of Deer Park wastewater treatment plant and an air separation plant, Praxair, Inc.

2.3 Site Inspections and Cleanup Activities

In 1993-1994, the city of Houston conducted investigations along Patrick Bayou and discovered the presence of pesticides, polycyclic aromatic hydrocarbons, cadmium, chromium, mercury, nickel, zinc, and polychlorinated biphenyls accumulating within Patrick Bayou sediments. The Texas Natural Resource Conservation Commission, now called Texas Commission on Environmental Quality (TCEQ), conducted follow up investigations in 1994 to confirm the city of Houston findings. In 2000, the TCEQ conducted an additional investigation and collected 18 sediment samples. These samples contained numerous inorganic and organic contaminants. The Environmental Protection Agency proposed the site to the National Priorities List on June 14, 2001, due to the potential harm of the sediment contaminants presented to the local wetlands and downstream fisheries.

The site was listed on the National Priorities List on September 5, 2002.

Section 3.0 Community Background

3.1 Community Profile

Once known for its abundance of deer in the area, Deer Park has evolved from an agriculture community to an industrial area. It is located approximately 20 miles southeast of Houston and approximately 50 miles north of the Gulf of Mexico. Recreational activities such as fishing, water sports, and various state parks and historical sites are offered in the area. The majority of the community members are employed by the industrial companies in the area. The population of Deer Park, TX, according to the 2000 census is approximately 28,520. The local demographics are as follows. The following figures are only estimates.

Ethnicity	Population
Caucasian	80.0% (23,044)
Hispanic	15.2% (4335)
African-American	1.3% (371)
Native American	0.9% (257)
Other Races	5.2% (1483)
More Than One Race	1.8% (513)

3.2 History of Community Involvement

An EPA Public Notice fact sheet was provided to the community in June 2001, to announce the Site being proposed to the National Priorities List. In September 2002, a fact sheet was provided to the community to announce the listing of the site on the National Priorities List. To date, there have been no other fact sheets produce for this site. Limited community involvement has been initiated at this site primarily due to the lack of activity at the site and the negotiation period with the potential responsible parties. As Site responsibilities and schedules are outlined in the negotiations, further community involvement can be expected. Fact sheets and various community meetings will be utilized to convey information to community members.

3.3 Key Community Concerns

The known chemicals in the sediment are chromium, copper, lead, mercury, nickel, selenium, zinc, hexachlorobenzene, bis-2-ethylhexyl phthalate, polycyclic aromatic hydrocarbons, and polychlorinated biphenyls. According to the Houston County Health District, community members have a general health concern for the amount of industrial facilities located in the community, but no specific concerns have been identified. During the comment period of the proposal of the site to the National Priorities List, a community member expressed concern for with the number of cancers from 1995-2001 and the potential runoff of site contaminants into residential areas. As of October, 4, 2007, the no other community concerns have been expressed in regards to the Site and the sediment contaminates. This does not imply that community members are not concerned about the Site. Many of the community members may fear a loss of employment as many of them are employed by the potential responsible parties. As EPA community involvement becomes more involved with the community more concerns may be elicited.

3.4 Response to Community Concerns

The Agency for Toxic Substance and Disease Registry addressed the cancer concern in the community during the proposal of the site to the National Priorities List. The Agency for Toxic Substance and Disease Registry completed an investigation on cancer clusters and could not conclude whether cigarette smoking or the industrial pollutants contributed to the slight increase of lung cancer in the area. Residences are located upstream from the Site and would not be affected by storm water runoff. Any future concerns identified by the community will be responded to in an appropriate and timely manner.

3.5 Summary of Communication Needs

To ensure community concerns are identified and are provided an appropriate response, community visits will be initiated by the EPA Community Involvement Coordinator. Fact sheets in regards to site activities will also be produced to provide the community the most current information on the site. An internet website has been established to assist in providing information to the community. EPA will also maintain a toll free number available to the community to allow immediate access to the Site EPA Project Manager and Community Involvement Coordinator.

Section 4.0

EPA's Community Involvement Program

The overall goal of EPA's community involvement program is to promote two-way communication between citizens and the EPA and to provide opportunities for meaningful and active involvement by the community in the cleanup process. EPA will implement the community involvement activities described below. The following plan is based on the results of the community interviews described earlier; it addresses each issue that was identified as being important to the community.

4.1 The Plan

Issue 1: Keeping the public informed and up to date.

Activity 1A: Designate an EPA Community Involvement Coordinator (CIC).

- Objective: To provide a primary liaison between the community and the EPA, and to ensure prompt, accurate, and consistent responses and information dissemination about the site. In those instances where EPA's CIC may be unable to provide adequate information (such as on technical issues), inquiries will be directed to the appropriate EPA contact.
- Method: EPA will designate an EPA CIC to handle site inquiries and serve as a point of contact for community members. The CIC is appointed by the Region 6 headquarters. Jason T. McKinney is the new EPA CIC assigned to the site. He will work closely with Philip Allen, EPA's Remedial Project Manager for the site.
- Timing: The new CIC was designated on July 2008.

Activity 1B: Prepare and distribute site fact sheets and technical summaries.

- Objective: To provide citizens with current, accurate, easy-to-read, and easy-understand information about Patrick Bayou.
- Method: Fact sheets will be mailed to all parties on the site mailing list. In addition, copies will be available at the information repository and in various cooperating business locations in the community.
- Timing: EPA will prepare and distribute fact sheets as needed depending on site activities and community needs.

Activity 1C: Involve students, parents, teachers through area schools.

- Objective: To educate faculty, students and their parents about the site, to invite and address their concerns regarding it, and to caution students about the site.
- Method: Address school faculty and students through visits and presentations to classroom, faculty, school assembly, or other meetings or events. Additionally, communicate with parents through take-home materials provided to the students and/or by attending and participating in PTA meetings or events.
- Timing: As community concern warrants or at least every year until the site is closed out.

Activity 1D: Provide a toll-free “800 number” for the community to contact EPA.

- Objective: To enable citizens to get the latest information available when they want it, rather than having to wait for a meeting or a fact sheet, and without incurring any cost.
- Method: EPA will activate the 800 number and publish it periodically in the local papers and in all fact sheets.
- Timing: The line is currently operational (1-800-533-3508).

Activity 1E: Maintain a mailing list for the Site.

- Objective: To facilitate the distribution of site-specific information to everyone who needs or wants to be kept informed about the site.
- Method: EPA will create a mailing list that includes all residences adjacent to the site, in known or suspected paths of migration, or those otherwise affected by the site. EPA will also solicit interested parties via fact sheets, newspaper articles, public meetings, public availabilities, etc.
- Timing: EPA will begin working on this mailing list immediately and will review/revise it periodically to keep it current.

Activity 1F: Establish and maintain Information Repositories.

- Objective: To provide a convenient location where residents can go to read and copy official documents and other pertinent information about the site and EPA activities.

- Method: The repository is a reference collection of site information containing the Administrative Record file, other site-specific information, the Community Involvement Plan, information about the Technical Assistance Grant program, and the general Superfund process. The Community Involvement Coordinator will work with a local contact to establish the local repository. This repository will be accessible to the physically challenged, will have copier facilities, and will be available to residents during normal business hours and at least some evening and/or weekend hours. Additional repositories may also be established, including one at the Texas Commission on Environmental Quality in Austin, TX.
- Timing: EPA established the local repository on September 5, 2002 located at the Deer Park Public Library, 3009 Center St, Deer Park, TX, 77536. EPA will add new documents as they become available.

Activity 1G: Provide Site and Superfund information on the Internet.

- Objective: To provide key resources for searching and listing both general and specific information about Superfund and hazardous waste issues.
- Method: A Site Status Summary for this site can be found at <http://www.epa.gov/earth1r6/6sf/6sf-tx.htm>. Information about EPA and Superfund can be found at: EPA Headquarters: <http://www.epa.gov>
EPA Region 6: <http://www.epa.gov/earth1r6>
EPA Region 6 Superfund Division: <http://www.epa.gov/earth1r6/6sf/6sf.htm>
The Proposed Plan and the Record of Decision (ROD) for the site will be placed on the internet as they are completed.
- Timing: Site Status Summaries are periodically updated.

Activity 1H: Provide Technical Assistance Grant (TAG) information.

- Objective: To provide resources for community groups to hire technical advisors who can assist them in interpreting technical information about the site.
- Method: EPA will provide information about the TAG program at public meetings and in site fact sheets. EPA will also provide briefing sessions to interested groups if so requested. EPA will provide TAG applications to qualified groups, and will provide assistance to the group in completing the application.
- Timing: EPA will continue to promote TAGs until one is awarded.

Activity 1I: Establish and maintain the Administrative Record.

- Objective: To provide residents with a paper trail of all documents, resources, etc. used by the Regional Project Manager and Site Team in reaching all decisions about the site and its cleanup.
- Method: EPA will provide at least two sets of the Administrative Record for the site, one in the EPA Region 6 offices located at 1445 Ross Avenue, Dallas, Texas 75202 and one located in the local Information Repository near the site.
- Timing: The Administrative Record is opened as soon as site investigation begins and remains open until the last ROD is signed.

Issue 2: Provide adequate and meaningful opportunities for community involvement.

Activity 2A: Hold public meetings.

- Objective: To update the community on site developments and address community questions, concerns, ideas and comments.
- Method: Refer to Appendix H for suggested meeting locations. EPA will schedule, prepare for, and attend all announced meetings. EPA will provide at least two weeks' notice of the scheduled meeting. The Regional Project Manager, Community Involvement Coordinator, and other appropriate EPA staff will attend.
- Timing: A public meeting is required during the Proposed Plan comment period (see below). EPA will hold other public meetings as appropriate.

Activity 2B: Encourage formation of a Community Advisory Group (CAG).

- Objective: To provide citizens with a meaningful way to become actively involved, and to provide the Site Team with a viable means of learning citizen concerns and attitudes.
- Method: EPA will encourage the formation of a CAG and provide support as appropriate to facilitate its formation. If formed, EPA will provide administrative support but will not be an active member.
- Timing: EPA will respond to any requests for help to form a CAG. As necessary, EPA will promote CAGs regularly throughout the Superfund process until one is formed.

Activity 2C: Make informal visits to community.

- Objective: To help keep community members informed about the site, while providing EPA with feedback about site activities and the community's opinions.
- Method: EPA will establish a presence in the community through informal, often unscheduled visits to talk spontaneously with local residents.
- Timing: Throughout the entire Superfund process.

Activity 2D: Solicit comments during a Public Comment Period.

- Objective: To give community members an opportunity to review and comment on various EPA documents, especially the Proposed Plan. This provides the citizens with meaningful involvement in the process and also provides the Site Team with valuable information for use in making decisions.
- Method: EPA will announce each comment period separately. Announcements will appear in local newspapers and EPA fact sheets; they will include particulars on duration, how to make comments, where to submit comments, etc. EPA may solicit comments on the following information/draft documents: draft CIP, draft summary of test results (not individual tests) and initial interpretation, preliminary findings on the RI and a list of possible remedies likely to be considered, preliminary findings of the FS and a brief summary of the leading contender for the proposed remedy, and preliminary plans for implementation and construction.
- Timing: Comment periods will be announced as appropriate. A comment period is required in conjunction with the announcement of the Proposed Plan and will last a minimum of 30 days.

Activity 2E: Prepare and issue a Responsiveness Summary.

- Objective: To summarize comments received during comment periods, to document how the EPA has considered those comments during the decision making process, and to provide responses to major comments.
- Method: EPA will prepare a Responsiveness Summary as a section of the Record of Decision. The Responsiveness Summary will include four sections: 1. Overview; 2. Background on Community Involvement; 3. Summary of comments received and Agency responses; 4. Remedial

Design/Remedial Action concerns. All information, both technical and nontechnical, will be conveyed in a manner that is easily understood.

- Timing: EPA will issue the Responsiveness Summary as part of the Record of Decision.

Activity 2F: Revise the Community Involvement Plan (CIP).

- Objective: To identify and address community needs, issues, or concerns regarding the site or the cleanup remedy that are not currently addressed in this CIP.
- Method: The Revised CIP will update the information presented in the previous version of the CIP.
- Timing: EPA will revise the CIP as community concern warrants or at least every three years until the site is closed out.

Activity 3I: Provide Technical Assistance Services for Communities (TASC) information.

- Objective: A headquarters contracting mechanism that provides a resource for independent, non-advocacy educational and technical assistance to a community affected by hazardous waste sites regulated by CERCLA and RCRA. This contract service is provided to communities so they can more effectively participate in the hazardous waste cleanup process in a more expedited manner.
- Method: EPA will provide information about the TASC program at public meetings and in site fact sheets as applicable. EPA will also provide briefing sessions to interested groups if so requested. EPA will provide information on TASC contract information to qualified groups, and will provide assistance to the applicant group in completing the Statement of Work for the contract application.
- Timing: As needed

4.2 Time Frame Summary for Community Involvement Activities

ACTIVITY	TIME FRAME
Designate an EPA Community Involvement Coordinator (CIC)	Completed
Prepare and distribute site fact sheets and technical summaries	As needed, at least two yearly
Involve students, parents, teachers through area schools	As needed, at least annually
Provide a toll-free "800 number" for the community to contact EPA	Currently in operation
Maintain a mailing list for the Site	Ongoing
Establish and maintain Information Repositories	Established, update as needed
Provide Site and Superfund information on the Internet	Currently available; update as needed
Provide Technical Assistance Grant (TAG) information	Ongoing
Establish and maintain the Administrative Record	Established, update as needed
Conduct special events	As needed
Hold community/public meetings	As needed
Encourage formation of a Community Advisory Group (CAG)	Ongoing
Make informal visits to community	As needed
Solicit comments during a Public Comment Period	As needed and required
Prepare and issue a Responsiveness Summary	Following public comment periods
Revise the Community Involvement Plan (CIP)	As needed, at least every 3 years
